

Justice for Prosperity

"If we want democracy to flourish, we will have to fight for it", President Barack Obama

Fight Subversion. Stay Safe.

Those that stand up for social justice and our democracies need to be protected. Activists and journalists want to be able to tell if they are being followed home after a protest or meeting a source. The director of an NGO wants to help their people overseas know how they can keep themselves and their families safer. And, a gender professional wants to know what type of resistance they can face when working in the field and how to deal with that. These are just some of the examples in which awareness and tools for protection are key. To support individuals, organizations, and students, Justice for Prosperity (JfP) offers a variety of services that do just that.

JfP is a non-profit NGO that puts tools for protection in the hands of vulnerable groups under siege. From youth, (political) activists, journalists, HRDs, and NGOs, to ordinary citizens. We help prevent and prepare when it is quiet, and support during and after tumultuous times. Applying decades of experience in international intelligence, security, and diplomacy, we put our ethics and morals over profit to help protect our democracies.

What JfP Offers

The **training** **field support** and **products** JfP offers are modular, tailored, and offered by experts.

Depending on the situation, services can be offered at the office, at home, or on-site, such as in the field. Some situations carry a higher risk or are more urgent, and have greater exposure. Together we assess what you or your team needs, when, and where.

High	Situational Behavior Training On-site learning to blend into unnatural situations. How to meet a source, have a brush contact, or fill/empty a dead letter box.	Privacy Protection Products Devices for detecting eavesdropping devices, secure communication, or tracking of vulnerable staff/activists. Camera/security safeguard products, incl. instruction/training.	Hot Operational Field Support Rapid Response Support Teams to assist with ransom negotiation and delivery, or evacuation of staff.
	Threat and Risk Assessment Case-by-case basis assessment of offices, homes, travel patterns, and routines. Concluding report with mitigative measures. Optional: landscape analysis of opposing actors, anti-rights intelligence briefs.	Predictive Awareness Training Learn how to categorize aggressors and risks based on their behavior and anticipate how to act. Theoretical and situational briefing and training.	Cold Operational Field Support Support with logistics, recon, and protective counter-surveillance: dynamic to static observation (street, car, buildings, etc.). Field support in non-emergency/threat situations, and post-incident investigations.
Risk	Security and Digital Awareness Training for teams or organizations. Tailored to the existing culture, available tools, and needs.	Red teaming / Penetration Test On-site alertness and resilience test of individuals, teams, organizations, and buildings. Includes outcome report with risks and proposed mitigation.	Counter-Surveillance Training Recognize and counter being followed and monitored at home, work, or in public. Tailored to specific needs.
	Security Policies and Procedures For individuals, teams, organizations.		
Low	Psychological Support Training and consultation to build resilience, wellbeing, or post-incident support		
	Low	Exposure / Hostility	High

Fight Subversion. Stay Safe.

JfP Team

Our **team is a diverse collective** of people that are former government, intelligence officers, researchers, activists, licensed psychologists, legal experts, data scientists, and diplomats. Our leadership served at the highest levels of Europol (Mr van Gemert), the US government (Mr McAleenan) and UK government (Ms Milburn), and United Nations (Mr Postma). We put our first-hand experience to work for vulnerable groups under siege, train those that stand up for our democracies, and return power to the people.

Cases & Clients

JfP exclusively works for non-profits, NGOs, educational institutes, grassroots organizations, individual (investigative) journalists, and social justice/political activists/advocates. JfP clients include the ROC Amsterdam, Royal Tropical Institute (KIT), Forbidden Colours, individual activists, and refugees through [rainbow.whodis](#) 🌈 In the past, JfP staff successfully built tools for the Netherlands' General Intelligence and Security Service, the National Coordinator for Counter Terrorism and Security, Europol, governments globally, and the [United Nations](#) 🌐. Now our people put this success to work as an NGO because **people under siege equally deserve these tools**. JfP's special attention goes to the LGBTIQ+ community, and political and women's rights activists.

Ethics

JfP only works **for people with their hearts in the right place** and who contribute to a better society for everyone. That means we don't work for the highest bidder, nor will we turn around and work for less-than-ethical clients. We perform checks before accepting a new client, whether you are an NGO, education institute, or individual. We work in full client confidentiality and will never reuse or sell confidential information to third parties. JfP can always support you in deciding which training, product, or field support fits your situation best. We pride ourselves on being honest, predictable, and straightforward.

Costs

As a non-profit, **we cut commercial margins**. Products and services are offered at actual cost-covering rates. In most cases, our clients do not pay VAT for our services. JfP is flexible, our products and services are modular and scalable, so anyone can benefit from them regardless of how big or small. All JfP services are available on an Ad Hoc, Subscription, or Retainer basis. The Dutch Tax Administration has recognized us with the status of Public Benefit Organization (Nr: 8625.72.034).

WhoDis

The informal shorthand for "Who is this?" and JfP's motto for our tech-enabled investigations into subversion: the undermining of our democracies, rights, and freedoms. We identify how it happens, and **turn that knowledge into action** by using it as the foundation for our risk assessments and products. To stop aggressors with anti-rights and extreme agendas from succeeding. That is intelligence and security for good. We would gladly tell you more about WhoDis and how we incorporate it into our work for clients.
