Call	<i>Support to European Cooperation Projects 2024</i>
Strand or category	<i>Small Scale Cooperation Projects</i>

Cultural operator – who are you?

Name of organisation	Absonus Lab
Country	<i>Portugal</i>
Organisation website	<i>www.absonuslab.org</i>
Contact person	<i>hugopquete@yandex.com Hugo Paquete, ericafrotafernandes@gmail.com Erica Frota and for general communications absonus.lab@yandex.com Absonus Lab.</i>
Organisation type	<i>Cultural nonprofit organization.</i>
Scale of the organization	<i>Small: 3 employers and collaborators</i>
PIC number	<i>883415958</i>
Aims and activities of the organisation	<i>Absonus Lab is a private non-profit association based in Estarreja, in the Central region of Portugal. This initiative began in 2022 with the aim of developing a laboratory for sound and musical experimentation, fostering transdisciplinary dialog, in which research, art, technology and science come together to build knowledge, based on post-digital meta- methodologies of challenging theoretical and practical production, where sound is part of a technocultural and intercultural ecosystem. It aims to reflect on culture, communities, means of production and aesthetic relationships of meaning between music and society. The aim is to develop strategies for creative production, dissemination and problematization in local and international events related to the sound arts, digital media art, computer music, acousmatic and experimental electronic music performance, contextualized in a contemporary approach. Absonus Lab works with the public and private sectors to share knowledge of the implications and intersections between art and technology, associated with contemporary sound-music and performance practices. We have a collaboration protocol with the University of the Algarve and the CIAC: Communication Sciences and Arts Research Center.</i>
Role of the organisation in the project	<i>Artistic Partner</i>
Previous EU grants received	<i>None - First time applicant</i>

Proposed Creative Europe project – to which project are you looking for partners?

Sector or field	<i>Performing arts, Contemporary music, Sound art, NGOs, Festivals, Curators, Science, Residence, Technology and Art interested in experimental cross disciplinary art formats.</i>
Description or summary of the proposed project	Presentation of our project: <i>"Negentropy: The Last Man in the Wasteland." This innovative electronic E-Opera</i>

	<p><i>comprises four arias that venture into the realms of existence, portraying the final moments of a man in an electronic wasteland reminiscent of a post-apocalyptic cloud. Within this narrative, the very essence of existence deteriorates into a state of madness and suffocation.</i></p> <p><i>Our project delves deep into the awareness of the intricate geopolitical and climatic challenges intertwined with the fragility of our environment. It sheds light on pressing issues such as scarcity, deprivation, human isolation, pollution, health crises, and the disintegration of societal and mental well-being. These themes emphasize the compelling necessity for a global concerted effort to focus on our planet's resources, circumstances and ultimately, its survival. Paying homage to the last works written by the composer Jani Christou. This E- opera reformulates and draws inspiration from the compositions Anaparastasis I: The Baritone (1968) and Anaparastasis III: The Pianist (1968) as its expressive core. Integrating electronic music, interactive technology and video mapping.</i></p> <p><i>We firmly believe that addressing these profound issues transcends rational thinking alone. It is paramount that we foster a profound and experiential connection with both our environment and the human narratives that explore apocalyptic and dystopian visions. In doing so, we aim to reconnect with ancient narratives that underpin the ethical fabric of society, where destruction serves as a pathway to rebirth as feedback narrative base in the human imagination.</i></p> <p>Project Overview: <i>Our vision centers on the promotion of an experimental electronic opera. We place a significant emphasis on investigating the intricate interplay between environmental and psychological deterioration and the resilience needed for recovery and awareness.</i></p> <p>Project goal: <i>Establish a presence in diverse European regions, fostering collaboration with local scientists, communities, artists, organizations, civil society groups, NGOs, festivals, venues, and other relevant stakeholders over an extended period. We are interested in collaborate in a range of activities, such as meetings, performances, seminars, talks, and workshops.</i></p>
Partners currently involved in the project	<p><i>Planetario do Porto Centro Ciencia Viva. Lisboa Incomum. ESAP: Escola Superior Artística do Porto. UAlg: Universidade do Algarve. CIAC: Centro de Investigação em Artes e Comunicação. Artech International. Palacio do Bolhão: ACE Escola das Artes. LTK4 Maus Hábitos Espaço de Intervenção Cultural. Museu da Musica Mecânica. Camara Municipal de Aveiro.</i></p>

	DGartes: Direção Geral das Artes. Republica Portuguesa: Cultura.
