1. DEFINICIÓN DE LA IDEA DE PROYECTO (NETWORKS OF TOWNS).

EPICURO Asociación Europea de Ciudades y territorios Innovadoras/es dentro de una perspectiva de Resiliencia Urbana (municipal), tiene como objetivo fomentar la participación democrática y cívica de los ciudadanos en los territorios implicados, mediante su comprensión de las políticas en torno al cambio climático y la puesta en marcha de mecanismos que faciliten la participación social y el voluntariado en el desarrollo de estrategias resilientes compartidas y participadas a nivel de la UE.

.4 Short description of the project, including its aims in English, in French or in German (2000 character)

In recent years, climate change is leading to a wide range of impacts on the environment, the economy and peoples. Societies are necessarily called to adapt to the occurred changes and to prepare for plausible scenarios of future climate change. To help promote this adaptation, the EU Commission supports adaptation actions in countries, helping to make Europe more climate-resilient, enhancing its capacity to respond to the impacts of climate change.

For its wide range of impacts, climate change adaptation is considered in numerous EU initiatives, with 20% of the Europe2020 budget dedicated to climate-related actions. National, regional and local authorities are called to put in place assessment processes and to contribute to the main strategy conducted at EU level, in relation to the central role they play in developing solutions for decreasing natural disasters impact, counteract their negative effects, limit recovery costs and safeguard communities. In doing so they increasingly feel the need to explore all potentialities of

Dear partners

Thanks for answering to my partner search positively and for the interest shown towards the project idea

Please find hereinafter a detailed project description and some more technical info about the project

Moreover I kindly ask you to confirm your participation by sending me via email the filled in form here attached by Wed 29th July so that we can understand more about your city.

Especially in the partner profile section please insert all relevant info about initiatives conducted so far in relation to natural disaster management and resilience and future actions you are planning to undertake.

➤ Project description

Recent natural disasters in Europe, and worldwide, demonstrate that defense structures can not be considered as a sufficient protection for people and properties. New strategies aim for a more holistic approach to natural events risk management when taking into account uncertainties of a changing climate and increased urbanization. The most important aspect of such strategies is the **adaptability and flexibility of the involved territories**.

Territorial authorities , which play a central role in developing solutions for decreasing natural disasters impact, counteract their negative effects, limit recovery costs and safeguard communities, are increasingly feeling the need to explore all potentialities of **multi-actor partnerships and engagement in EU long term collaborative action** on building resilience so to promote and implement effective local resilience strategies.

In such a framework, *Local Authorities and Local Communities* play a central role in the process of building the capability to withstand disaster into by shifting the attention to the Disaster Risks prevention phase which can be performed by means of adequate territorial/urban policies, institutional and individual behaviors. Social and institutional factors often form strong barriers to the successful implementation of natural risk management strategies.

The Association of Municipalities "Sierra de San Pedro" has a large experience of more of 12 years in similar programmes. The Association has been involved in environmental management initiatives throughout the 9 villages and cities that form it. This entity is included in the Extremadura Network of Health and Sustainable Cities, counting as well with a technical service for a selective management of wastes within its territorial framework. Moreover, Association's activities also entails fostering environmental respect of the population. On the basis of this support, the Association has carried out numerous informative and awareness events and campaigns on the climate change issues, waste management cycle and the relevance of sustainability in the local context. For all these activities, Association's personnel has been the main responsible including administrative and financial tasks for both own and external procedures addressing local, province, regional and European requirements.

Asunto: RE: CONSULTA PROYECTO EPICURO (PROGRAMA EUROPE FOR CITIZENS)

Estimado Manuel:

Muchas por remitirnos su proyecto. En el presente correo incluimos una serie de comentarios relativos al proyecto EPICURO, perteneciente a la convocatoria de Red de Ciudades, si bien, deben tener en cuenta que el Punto Europeo de Ciudadanía no participa en los procesos de selección, sino que esta es realizada por responsables expertos e independientes de la EACEA.

El Medioambiente es uno de los objetivos y prioridades estratégicas de la Comisión Europea, cuestión que se refleja en directivas, recomendaciones y sobre todo en la Estrategia EUROPA 2020, que representa la hoja de ruta europea para este periodo. A pesar de estas cuestiones y que dentro del programa Europa con los Ciudadanos han sido beneficiarios proyectos con temáticas parecidas, este es el caso de *Network of Livable Cities - Sustainable Energy Usage and Handling the Effects of Climate Change on Local Life (HU)*, *Working for Environmentally Educated Towns*

EUROPE FOR CITIZENS

Before you begin completing this eForm:

- Test your connection to the Agency's online submission service. Click on the 'Test your connection' button in the footer of the eForm. This is not to submit your form but merely to test that your software settings and internet connection allow an application to be submitted. If having clicked on this button, you do not receive a confirmation that your connection was successful, please consult the 'Known Issues' section of the eForm homepage. Here you can find, amongst other things, advice on internet settings and Adobe (Reader or Acrobat) security settings, either of which can prevent a successful connection to the Agency's online submission service. Please note that, if after performing a successful test, you move your eForm to a different computer or upgrade your version of Adobe Reader, you will need to perform the test again. This is because the original test result will no longer be valid. For a fuller description of how the 'Test your connection' function works please consult the eForm User Guide.

- Check that you have the latest available version of the eForm. In the event of a significant eForm problem arising, the Agency may decide to make available an updated i.e. corrected version of the eForm. The latest version number of each eForm is displayed on the eForm homepage whilst specific details of any problem and its impact would be published on the funding opportunity webpage of the programme concerned.

These resources and other useful links can be found in a table located at the end of this eForm.

Dear Juan Pablo, Manolo and my colleagues Francesca and Manuela I have created a specific account for EPICURO - NETWORK OF TOWNS project which we can all access in order to manage communications with project partners from a dedicated email address.

In order not to create confusions with partners, I would suggest to sign emails with the general sentence "Epicuro coordination team" so that partners do not receive communications from different people every time.

Password to access the email address is:

This email address can be used only by coordinators (Mancomunidad + EPC) so please do not share password and details with project partners.

I will share another email in a couple of minutes summarising the Skype meeting contents which Juan Pablo and I discussed an hour ago.
